

Petersen Contracting Inc. is a multi-trade contractor and full service general contracting company.

List Of Services In House

Electrical: With decades of experience in the industry, our team is set up to take care of your electrical needs from design to completion. Engineering, power distribution, lighting, controls, emergency power, commissioning and coordination studies. We will work with you to provide the best solutions for your needs.

Fire Alarm: As an engineered system dealer of fire alarm systems, we will design, supply, install, verify, inspect and maintain your fire alarm system. Our team of certified CFAA technicians will help you understand your system and what the requirements are for your jurisdiction and occupancy.

Fire Extinguishers: Our accredited shop is equipped to stock, inspect, maintain and re-certify all of your properties fire extinguishers. Our trained staff, following NFPA 10, will ensure that you have the proper coverage and your extinguishers are well maintained so they are ready when you need them most.

Thermography: Infrared, or thermography, allows trained individuals to see hot spots and anomalies the naked eye would not be able to. Our certified thermographers have the equipment and experience to identify potential electrical challenges before they cause unexpected downtime and costly repair bills.

Arc Flash and Coordination Studies: An arc flash and coordination study ensures electrical equipment and protective devices coordinate properly during faults, mitigating risks to personnel and equipment, and ensuring compliance with safety standards. Arc Flash studies are required per NFPA, CSA Z462 and CEC.
